# The Digital Patient – Guidelines to Optimize Predictable Surgical Workflows

*“The uniqueness of edelweiss CAD/CAM BLOCKs lies in the manufacturing process where through the patented vitrification and laser sintering process a state of the art hybrid glass block is manufactured. This ensures the edelweiss CAD/CAM BLOCK combines the properties of current CAD/CAM systems into one single block. It resembles the esthetics of a feldspathic glass, the strength of particle infiltrated ceramic and the resilience and ease of reparability of composite blocks.”*  
– Marco Tutds –

## Synopsis

Learn the latest trends, from Dr. Marco Tutds, D.D.S M.Sc.D, in minimally invasive Prosthetic procedures that will feature a clinical case to show step by step, easy to use procedures on CAD/CAM technology which includes guidance from digital workflows on treatment planning for patient up to laboratory communications for a successful result.

Moreover, this webinar will teach and show you an alternative restorative material that can be immediately loaded to an implant for shorter treatment duration that will raise the bar the way you do your dental practice.

## Time & Place

Time: 8:00 PM (Manila/Singapore/HK)  
Duration: 1 hour lecture, 30 minutes Q&A  
Media: Zoom Webinar  
Language: English

## Registration

Registration Fee: none / free
